** Where 1 = the most deprived

The increase in the numbers of Southampton's LSOAs in the most deprived 10% nationally raises questions of what has changed between the IMD 2004 and the IMD2007. However, as these are relative measures it is not possible to conclude that crime deprivation in the City has got worse, also changes in crime recording practices during this time could have had some impact.

Approximately 41,900 people or 18% of the population live in the LSOAs in the 10% most deprived in England.
