## **SOUTHAMPTON CITY COUNCIL**

### **GUIDANCE ON STANDARDS FOR HOUSES IN MULTIPLE OCCUPATION (HMOS)**

#### **Introduction**

These standards assist landlords and developers to design, improve and maintain HMOs to a reasonable standard. These standards cover both licensed and non-licensable HMOs.

The standards may be revised from time to time. To ensure that these standards are current, please check with the City Council website on [www.southampton.gov.uk/living/housing](http://www.southampton.gov.uk/living/housing). New editions of the standards will be re-dated.

Further information about standards for privately rented houses is available on the City Council website including mandatory licensing and the Housing Health and Safety Rating System (HHSRS).

Enquiries about HMOs can be made to Private Housing at Southbrook Rise, 4-8 Millbrook Road East, Southampton. Telephone: 023 8083 3006 or e-mail: [private.housing@southampton.gov.uk](mailto:private.housing@southampton.gov.uk).

There is considerable diversity in the way that HMOs are occupied and in the health and safety risks that may be present. This advice therefore suggests standards that are appropriate for a wide range of the most common types of HMO.

The advisory standards are flexible and can be adapted to suit circumstances. The exception is in regard to licensed HMOs where national minimum HMO standards must be complied with and in particular the level of bathroom, WC and wash hand basin provision.

As part of the HMO licensing process, the council can discuss with landlords any variations from the standards that may be appropriate for a particular HMO.

#### **WHAT IS A HOUSE IN MULTIPLE OCCUPATION?**

The Housing Act 2004 redefines a HMO as a building or part of a building (i.e. flat) which:

- Is occupied by persons not forming a single household and;
- Two or more households occupy and share one or more basic amenities (or lack such amenities);
- Is occupied by more than one household and is a converted building not entirely comprising of self-contained flats;
- Comprises entirely of self-contained flats and the conversion does not comply with the Building Regulations 1991 and less than 2/3 of the flats are owner occupied;
- The HMO is occupied as the only or main residence;

- Rents are payable or other consideration is provided in respect of at least 1 of those occupying the HMO.

### **ARE ANY BUILDINGS EXEMPT?**

Yes – the following are exempt from the HMO definition:

- Building occupied by only two people who do not form a single household;
- Buildings managed by educational establishments, Local Housing Authorities, Registered Social Landlords, Police, Fire, Health Authority or regulated by other legislation such as residential care homes etc;
- Buildings occupied by religious communities;
- Buildings predominantly owner occupied, including residential landlords where the owner occupier (and family members) occupies the building (or flat) with no more than 2 other persons;
- Buildings converted into self-contained flats, where the conversion meets 1991 Building Regulations.

### **WHAT IS A SINGLE HOUSEHOLD?**

A single household includes members of the same family either by blood, marriage or other recognised means such as adoption or fostering. As an example, four friends sharing a student dwelling will be classed as four individual households and therefore a HMO.

### **EXPLANATION OF CATEGORIES OF HMOs**

The number of amenities and the health and safety standards that are appropriate for an HMO are related to the differing needs of different types of occupiers. These standards take this into account and suggest different standards for different categories of HMOs as described below:

#### **Category A HMOs**

These are HMOs comprising parts that are rented as individual lettings with exclusive use of certain rooms. Occupiers may share washing, WC and kitchen facilities, but do not usually have a communal living room. The occupiers of this type of HMO tend to live completely independently of each other and have individual tenancy agreements.

Individuals or households may have a letting agreement that specifies the part(s) of the accommodation that they may occupy.

Typical examples are:

1. Single room bedsits – may have exclusive use of, or may share, personal washing, WC and kitchen facilities
2. Flatlets – multi-room lettings sharing some personal washing, WC and kitchen facilities.

## **Category B HMOs**

These are HMOs that are rented to a group of people, commonly students or young professional adults, who may be on a group/joint contract. Occupiers share personal washing, WC and kitchen/dining facilities and usually have a communal living room. The occupiers of this type of HMO tend not to live completely independently of each other and may operate communally.

## **Hostels**

These are HMOs that are generally referred to as hostels, guest houses, or bed & breakfast accommodation which provide accommodation for people with no other permanent place of residence. The accommodation is often on a temporary basis.

The category includes hostel and bed and breakfast establishments used by local authorities for housing homeless people, or similar establishments which provide accommodation for single people whose only financial support is state benefit and who would otherwise be homeless.

## **General notes to be read in conjunction with the HMO standards provided on the next pages**

No kitchen facility should be more than one floor distant from the users of that facility. This will not apply if a communal living space or dining space is available on the same floor, or is not more than one floor away from the kitchen.

No personal washing or WC facility should be more than one floor distant in the case of a category A HMO, or two floors distant in the case of a category B HMO, from the users of those facilities.

A small household is one that consists of no more than 2 persons. Sleeping rooms should not be occupied by more than 2 persons. No persons should share a room unless:

- they are married, or living together as if married
- they are parent and child (as long as the child is the same sex as the parent, or the child is under 10 years of age if opposite sex)
- they are members of the same family and are both of the same sex, e.g. 2 brothers (if below 10 years of age, opposite sexes can share a room)

There may be exceptions to the above sharing rule in bona fide hostels and similar establishments. Advice should be sought from the City Council in these cases.

The term 'bathroom', as used in the standards, normally means a bathroom containing a bath or shower, a WC and a wash hand basin. The basin should be of an adequate size for normal personal hygiene purposes including personal washing, the cleaning of teeth and shaving.

A wash hand basin with a constant adequate supply of hot and cold running water must be provided for each WC. If the WC is separate from a bathroom then a small hand rinse basin will suffice.

A standard cooking appliance should comprise four rings or hot plates, an oven and a grill. Microwave ovens may be satisfactory as supplementary cooking appliances but should not be the only cooking appliances.

The advisory room sizes do not include any en-suite bathroom facilities that may be provided, and do not include any floor area that is not effectively useable, for example, where the ceiling slopes to a low level.

An appliance with 2 rings or hot plates and oven is satisfactory for a one person unit of accommodation.

Sinks must be provided with a draining board and adequate constant supplies of hot and cold running water.

The provision of a second sink in a shared HMO may not be necessary if a dishwasher is provided. Private Housing will advise in these circumstances.
