

7. Income Domain

The income domain is designed to capture the proportion of people experiencing income deprivation in an area.

This domain combines the following indicators,

- Adults and children in Income Support Households (Source: Department for Work and Pensions (DWP) 2005).
- Adults and children in Income-Based JSA Households (Source: DWP 2005).
- Adults and children in Pension Credit (Guarantee) Households (Source: DWP 2005).
- Adults and children in those Working Tax Credit households where there are children in receipt of Child Tax Credit whose equivalised income (excluding housing benefits) is below 60 per cent of the median before housing costs (Source: HMRC 2005).
- Adults and children in Child Tax Credit Households (who are not eligible for IS, Income-Based JSA, Pension Credit or Working Tax Credit) whose equivalised income (excluding housing benefits) is below 60 per cent of the median before housing costs (Source: HMRC 2005).
- National Asylum Support Service (NASS) supported asylum seekers in England in receipt of subsistence support, accommodation support, or both (Source: NASS 2006).

Changes from the IMD 2004

The introduction of Pension Credit, Working Tax Credit and Child Tax Credit has meant that there are significant and inevitable changes from the indicators in the IMD 2004. The aim has been, in spite of these changes, to maximise comparability.

The Number of Southampton's 146 Lower Super Output Areas in 10% and 20% Most Income Deprived: SE & England

Number of Southampton's 146 Lower Super Output Areas	2007	2004
In 10% most deprived in England	8	7
In 20% most deprived in England	28	30
In 10% most deprived in South East	38	43
