

**ECONOMIC AND INTEREST OUTLOOK**

The economic interest rate outlook provided by the Council's treasury advisor, Arlingclose Ltd, for December 2012 is detailed below. The Council will reappraise its strategy from time to time and, if needs be, realign it with evolving market conditions and expectations for future interest rates.

	Mar-13	Jun-13	Sep-13	Dec-13	Mar-14	Jun-14	Sep-14	Dec-14	Mar-15	Jun-15	Sep-15	Dec-15	Mar-16
<b>Official Bank Rate</b>													
Upside risk			0.25	0.25	0.25	0.25	0.50	0.50	0.50	0.50	0.50	0.50	0.50
Central case	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50	0.50

**Underlying Assumptions:**

- Consumer Price UK growth is unlikely to return to above trend for the foreseeable future. Quarter 3 Gross Domestic Product (GDP) was strong at 0.9% but this momentum is unlikely to be sustained in Quarter 4 or in 2013. The rebalancing from public-sector driven consumption to private sector demand and investment is yet to manifest, and there is little sign of productivity growth. Further contraction in the Eurozone, including Germany's powerful economy, and slower forecast growth in the emerging economies (Brazil/Mexico/India) are exacerbating the weakness.
- Consumer Price Inflation (CPI) has fallen to 2.7 % from a peak of 5.2%. Near term CPI is likely to be affected by volatility in commodity prices and its decrease towards the 2% target is expected to be slower than previously estimated. Real wage growth (i.e. after inflation) is forecast to remain weak.

- The fiscal outlook for bringing down the structural deficit and stabilise debt levels remains very challenging. Weakened credibility of the UK reining its levels of debt poses a risk to the AAA status, but recent history (US, France) suggests this may not automatically result in a sell-off in gilts.
- In the absence of large, unexpected decline in growth, Quantitative Easing (QE) is likely to remain on hold at £375bn for now. The availability of cheaper bank borrowing and subsequently for corporates through the Funding for Lending Scheme (FLS) is a supporting factor.
- The US Federal Reserve's shift in its rate guidance from a date-based indication to economic thresholds, (6.5% unemployment, inflation 1 – 2 years out projected to remain below 2.5%, longer term inflation expectations remain well anchored), is likely to increase market uncertainty around the highly volatile US employment data releases.
- The Eurozone is making slow headway which has curtailed some of the immediate risks although peripheral countries continue to struggle. Fully-fledged banking and fiscal union is still some years away.
- In the US, the issues of spending cuts, reducing the budget deficit and raising the country's debt ceiling remain unresolved. A failure to address these by March 2013 could lead to a similar showdown and risks a downgrade to the US sovereign credit rating by one or more agencies.
- A reversal in market risk sentiment from current "risk on" to "risk off" could be triggered by economic and/or political events – impending Italian and German elections, US debt ceiling impasse, difficulty surrounding Cyprus' bailout, and contagion returning the haunt the European peripheral nations – could inject renewed volatility into gilts and sovereign bonds.
