<b>STATEMENT OF CONFIDENTIALITY</b>			
None			
<b>BRIEF SUMMARY</b>			
This report provides an update on progress of implementing the Transforming Care Plan for people with learning disabilities and autism. Southampton City Council and Southampton City Clinical Commissioning Group are working in partnership with local authorities and CCG's in Hampshire, the Isle of Wight and Portsmouth to implement the regional plan.			
<b>RECOMMENDATIONS:</b>			
	(i)	Health & Wellbeing Board to note the Transforming Care Plan and the progress made so far on the main areas of work within the plan.	
<b>REASONS FOR REPORT RECOMMENDATIONS</b>			
1.	The Transforming Care Plan includes actions aimed at improving the health and wellbeing of people with learning disabilities in the city. The Health and Wellbeing Board is therefore recognised as a key partner in the development and delivery of the plan.		
<b>ALTERNATIVE OPTIONS CONSIDERED AND REJECTED</b>			
2.	None. NHS England require all local authorities and CCG's to be part of a Transforming Care region.		
<b>DETAIL (Including consultation carried out)</b>			
3.	The Department of Health and NHS England set up the Transforming Care programme to strengthen the improvement work following the exposure of abuse of people with learning disabilities and autism at Winterbourne View in 2011. They require local authorities and CCG's to work in partnership with other local stakeholders to put together and implement a plan to transform care and support for children, young people and adults with learning		

	<p>disabilities and autism. One of the main aims of the programme is to facilitate the appropriate discharge of people with learning disabilities and autism in specialist in-patient units and to reduce, as far as possible, the number of people being admitted to these units. NHS England have set the national expectation that 45-55% of inpatients are discharged by 2019 and unnecessary inpatient beds will be closed at the same time. Historically the north of England has had much higher inpatient numbers than the south so their percentage reduction required is much higher.</p>
4.	<p>Southampton, Hampshire, the Isle of Wight and Portsmouth (hereafter called 'SHIP') have joined together to form one of the 48 Transforming Care partnerships in England. The SHIP Transforming Care Plan was submitted to NHS England in March 2016 and is a three year plan aiming to reduce the inpatient numbers to 30-40 beds per million population. There are currently 68 inpatients from the SHIP area of whom 25 are funded by local CCG's and 43 by NHS England specialised commissioning. The aim is for this to reduce to 53 inpatients by 2019.</p> <p>There are currently three inpatients from Southampton.</p>
5.	<p>Due to the low inpatient numbers, efforts to facilitate discharge are happening on an individual basis with joint work between case managers and commissioners to ensure that there is appropriate housing, care and wider community support available.</p>
6.	<p>Alongside the work to facilitate the appropriate discharge of current inpatients, there is also a focus on preventing future admissions to inpatient units and more broadly improving services for all people with learning disabilities and autism. The main work areas of the plan are:</p> <ul style="list-style-type: none"> <li>• Development of Community Services</li> <li>• Developing the Workforce</li> <li>• Developing a Regional Approach to Housing Development</li> </ul> <p>The following sections provide an update on progress for each of these work areas.</p>
7.	<p><b>Developing Community Services</b></p> <p>The overall aim of this workstream is to improve the services available in the community so that individuals can be appropriately supported in their own homes and local areas. The progress so far has been:</p> <ul style="list-style-type: none"> <li>• Development of a community forensic service which began taking referrals in September 2016. They will work with individuals with learning disabilities and autism who have been in contact with the criminal justice system and provide training to support agencies.</li> <li>• Continuation of the Learning Disability Acute Liaison Nurse role within the hospital (UHS). The Liaison nurse can support colleagues in the hospital to make reasonable adjustments so that any individuals with learning disabilities and autism are supported appropriately during their stay.</li> <li>• A pilot is due to start in early 2017 with a number of GP practices to</li> </ul>

	<p>make then 'Learning Disability Friendly' by for example providing accessible easy-read information. Findings from this pilot will then be built on and good practice spread more widely.</p> <ul style="list-style-type: none"> <li>• A strong focus on increasing the availability, uptake and quality of Annual Health Checks for people with learning disabilities and autism. This involves working with GPs, support providers and individuals to ensure the process of being invited for a health check, actual attendance and the resultant actions are clearly understood by all involved.</li> <li>• Local areas are developing 'At Risk' registers so that individuals who are at risk of being admitted to inpatient units are known about and appropriate support is in place from all organisations.</li> </ul>
8.	<p><b>Developing the Workforce</b></p> <p>The aim of this workstream is to have a skilled and stable workforce to support individuals with learning disabilities and autism. This is across clinical specialties such as Learning Disability Nurses and within the domiciliary care/support sector as well.</p> <ul style="list-style-type: none"> <li>• Mapping of the current health and social care workforce is taking place to understand where there are gaps and how these can be addressed.</li> <li>• Use of support approaches such as 'Positive Behaviour Support' is being expanded and there will be an expectation that all support providers include these approaches within their staff training.</li> </ul> <p>Providers themselves are involved in this workstream through a sub-group.</p>
9.	<p><b>Developing a Regional Approach to Housing Development</b></p> <p>The availability of appropriate housing for individuals is a high priority as is the need to have a range of housing options.</p> <ul style="list-style-type: none"> <li>• Housing workshops have taken place for people with lived experience and professionals to understand what is missing and what individuals want to see in terms of high quality housing.</li> <li>• Development of five bespoke flats across the SHIP area which inpatients or those at risk of becoming inpatients can use with specialist support.</li> <li>• Engagement with housing associations and other stakeholders to hear their views and identify opportunities for collaborative working.</li> <li>• Development of more supported living accommodation, including bespoke properties which enable individuals living in residential placements a long way from the city to move back to be close to their families and local communities.</li> <li>• Deregistration of some residential homes to supported living which gives individuals stronger legal rights to continue living within their own home, the ability to receive a wider range of benefits (if eligible) and to have greater choice over their home and their lives through accessing a personal budget.</li> </ul>
10.	All of the work areas have been developed in co-production with service

	users and their families. There is direct involvement of people with lived experience in the steering group and regular updates will be provided to Learning Disability Partnership Boards. An easy read version of the Transforming Care Plan has been written and given to stakeholders.	
<b>RESOURCE IMPLICATIONS</b>		
<b><u>Capital/Revenue</u></b>		
11.	Capital funding has been awarded to the SHIP partnership from NHS England to develop the five specialist forensic flats. The procurement and commissioning of this is being led by Hampshire.	
<b><u>Property/Other</u></b>		
12.	None	
<b>LEGAL IMPLICATIONS</b>		
<b><u>Statutory power to undertake proposals in the report:</u></b>		
13.	None	
<b><u>Other Legal Implications:</u></b>		
14.	None	
<b>POLICY FRAMEWORK IMPLICATIONS</b>		
15.	None	
<b>KEY DECISION?</b>		No
<b>WARDS/COMMUNITIES AFFECTED:</b>		People with Learning Disabilities and their families will be affected.
<b><u>SUPPORTING DOCUMENTATION</u></b>		
<b>Appendices</b>		
1.	SHIP Transforming Care Plan June 2016	
<b>Documents In Members' Rooms</b>		
1.	None.	
<b>Equality Impact Assessment</b>		
Do the implications/subject of the report require an Equality Impact Assessment (EIA) to be carried out.		No
<b>Privacy Impact Assessment</b>		
Do the implications/subject of the report require a Privacy Impact Assessment (PIA) to be carried out.		No
<b>Other Background Documents</b>		
<b>Equality Impact Assessment and Other Background documents available for</b>
