Southampton City Council

Housing Tenant Satisfaction Survey 2019

3rd June 2019

Executive Summary

Email: colins@marketingmeans.co.uk
Tel: 01364 654485
Background

Southampton City Council commissioned Marketing Means to undertake a telephone survey with housing tenants living in the city to gauge their satisfaction with the Housing Services at Southampton City Council (a repeat of the survey completed in 2017).

The overall response needed to be representative of all housing tenants both demographically and geographically.

Method

The housing tenant survey was undertaken using a telephone survey. The questionnaire used in the telephone survey was similar to that which was used in 2017 which took into consideration HouseMark’s STAR framework.

Southampton City Council provided a file of all tenant households.

A target was set to achieve 1,000 completed surveys. To ensure that the overall achieved response reflected the profile of the wider population (i.e. complete housing stock) quotas were proportionally set and monitored with regards to: tenure; ward; age and gender.

All interviewing was conducted from Marketing Means’ in-house call centre between 25th April and 14th May 2019.

Response

A total of 1,000 valid telephone surveys were completed for the Tenant Housing Survey, which ensured the overall +/-3% margin of error at the 95% confidence level was met.

In order to ensure a representative view of the wider housing stock, the data achieved gave consideration for the following factors: tenure; ward; age and gender to highlight any bias which may have been caused by over or under-represented groups.

As a result of this it was concluded the achieved sample was a true reflection of the overall stock and therefore no weighting has been applied to the data.

Key results

Overall Sheltered tenants were significantly more satisfied with their home, their neighbourhood and some services provided by the Housing Service at Southampton City Council e.g. repairs and maintenance, keeping residents informed compared with General Needs tenants.

Changes in the majority of satisfaction scores were small compared to the 2017 survey results, the greatest difference amongst the 7 core STAR questions being a 3.6% increase in those satisfied their rent provides value for money.

The 7 core STAR questions for all tenants are outlined in the table below:
## Core STAR question

Other results showed:

- 82% are satisfied with the advice and support they receive from Southampton City Council regarding paying rent and service charges, only 10% are dissatisfied.

- 66% are satisfied with the way the Housing Service at Southampton City Council deals with enquiries generally (a 6% decrease compared with the 2017 survey), 27% are dissatisfied.

- For those who had a repair in the last 12 months...
  - ...76% were satisfied with the ease of reporting the repair, 21% were dissatisfied.
  - ...79% were satisfied with being able to make an appointment convenient to them, 16% were dissatisfied.
  - ...78% were satisfied with the repair being completed first time, 17% were dissatisfied.

- 71% felt the Housing Service at Southampton City Council were good at keeping them informed about things that might affect them as a resident (a 4.3% decrease compared with the 2017 survey), 18% felt they were poor.

- Nearly half (49%) outlined they access the internet on a daily basis, 29% outlined they never use the internet.
- 57% of those who outlined they never use the internet outlined that they don’t have access or don’t know how to access the internet, 43% outlined they chose not to or don’t want to use the internet.

11.0: Future engagement/communication

Introduction
Background and objectives

Southampton City Council commissioned Marketing Means to undertake a survey with housing tenants living in the city to gauge their satisfaction with the Housing Services at Southampton City Council (a repeat of the survey completed in 2017).

The survey was undertaken following the STAR (Survey of Tenants and Residents) framework provided by HouseMark Ltd.

An overall target of 1,000 completed responses was set to ensure an appropriate level of statistical confidence. The overall response needed to be representative of all housing tenants both demographically and geographically.

Method

The housing tenant survey was undertaken using a telephone survey repeating the method used in 2017.

Note: Prior to the 2017 tenant survey, surveys undertaken by Southampton City Council had been undertaken using a postal method and therefore the results from these surveys will not be directly comparable.

The questionnaire used in the telephone survey was very similar to the question set which Southampton City Council created for the 2017 survey which gave consideration for HouseMark’s STAR framework.

Southampton City Council provided a file of all 15,548 tenant households. Following the removal of those without valid telephone numbers, 15,125 records were uploaded into the survey sample.

To ensure that the overall achieved response reflected the profile of the wider population (i.e. complete housing stock) quotas were proportionally set and monitored with regards to: tenure (i.e. general needs and sheltered); ward; age and gender. (Note: age and gender of main tenant as set out in the sample file).

All quotas were pre-set prior to telephone fieldwork taking place. Marketing Means’ quota management system ensured that once a given quota was met, no further interviews were conducted in that quota group.

All interviewing was conducted from Marketing Means’ in-house call centre using computer-assisted telephone interviewing (CATI) between 25th April and 14th May 2019.

All telephone fieldwork was completed between the hours of 09.30 and 20:30 Monday to Friday.

Please note the survey was open to any household member named on the tenancy who was named in the sample file, only one complete per household.

Housing Tenant Survey

Email: colins@marketingmeans.co.uk
Tel: 01364 654485
Confidence

A target was set to achieve 1,000 completed surveys to ensure the minimum requirement of a +/-3% margin of error (at the 95% confidence level) was met for a housing stock the size of Southampton City Council (as outlined in HouseMark’s STAR guidance).

Notes:

- The +/-3% margin of error only applies for an analysis across the whole stock covered by the survey. When results are analysed at sub-group level (e.g. by ward or tenure) then the margin of error increases.

- A confidence level (or interval) is a measure of how reliable the results from the sample are in relation to the wider population.

  Example: A 95% confidence level of +/- 3% means that any percentage result quoted will have a 95% likelihood of being no more than 3% higher or lower than the true value among the wider population; e.g. if the satisfaction level with a particular service is 55% for the sample (i.e. all respondents), then in 95% of cases the true figure for the entire population will be between 52% and 58%.

Throughout the report reference has been made to significant differences across different groups of respondents (with consideration for age, gender, ethnicity, household member long term health problem, tenure type and ward). This is where differences are deemed to be statistically significant within the data that was collected.

Weighting data

In order to ensure a representative view of the wider housing stock, the data achieved gave consideration for the following factors: tenure; ward and age to highlight any bias which may have been caused by over or under-represented groups.

As a result of this it was concluded the achieved sample was a fair representation of the overall stock and therefore no weighting has been applied to the data, therefore all data in this report is based on unweighted data.

Rounding

Figures for charts and tables have been rounded and may not total 100%.

Further notes:

- ‘Don’t know’, ‘not applicable’, ‘no opinion’ and ‘prefer not to say’ have been omitted from the data and charts in this report unless stated.

Author and publication

1 In fact, as the percentage result gets further from 50% in either direction, higher or lower, the size of the 95% confidence interval narrows, reflecting the greater imbalance between the proportions giving and not giving a particular response.
Marketing Means wrote this report in May/June 2019.

Any press release or publication of the findings of this survey requires the approval of the author/Marketing Means. Approval would only be refused if it were felt that the intended use would present inaccurate or misrepresented information.
Response

Overall
A total of 1,000 valid telephone surveys were completed for the Tenant Housing Survey, which ensures overall the +/-3% margin of error at the 95% confidence level was met.

Respondent profiles
The respondent profiles of the achieved sample compared with the overall Southampton City Council housing stock is shown below:

1.0 Satisfaction with the Housing Service provided by Southampton City Council

‘Taking everything into account, how satisfied or dissatisfied are you with the Housing Service provided by Southampton City Council?’

77% are satisfied with the overall Housing Service provided by Southampton City Council, 14% are dissatisfied.

Chart 1a: Overall satisfaction with Housing Service provided by Southampton City Council

Base: 1,000

Differences:

- Significantly more respondents aged 60+yrs are satisfied with the Housing Service provided by Southampton City Council (82%) compared with those 35-59yrs (75%) and those 34yrs and under (69%).

- Significantly more Sheltered tenants are satisfied with the Housing Service provided by Southampton City Council (83%) compared with General Needs tenants (75%).
Comparison with 2017 Housing Tenant Survey
No real statistically significant change from 2017 where 79% were satisfied with the overall Housing Service provided by Southampton City Council and 12% were dissatisfied.
2.0 Satisfaction with the overall quality of your home

‘How satisfied or dissatisfied are you with the overall quality of your home?’

78% are satisfied with the overall quality of their home, 15% are dissatisfied.

Chart 2a: Satisfaction with the overall quality of home

**Base: 1,000**

**Differences:**

- Significantly more respondents aged 60+yrs are *satisfied* with the quality of their home (89%) compared with those 35-59yrs (73%) and those 34yrs and under (64%).

- Significantly more respondents aged 34yrs and under are *dissatisfied* with the quality of their home (26%) compared with the older age groups. In addition the proportion dissatisfied aged 35-59yrs (17%) is significantly higher than those 60+yrs (7%).

- Significantly more males are *satisfied* with the quality of their home (84%) compared with females (74%).

- Significantly more females are *dissatisfied* with the quality of their home (17%) compared with males (10%).

- Significantly more Sheltered tenants are *satisfied* with the quality of their home (92%) compared with General Needs tenants (74%).

- Significantly more General Needs tenants are *dissatisfied* with the quality of their home (17%) compared with Sheltered tenants (4%).
Comparison with 2017 Housing Tenant Survey
No real statistically significant change from 2017 where just over three quarters (76%) were satisfied with the overall quality of their home and 18% were dissatisfied.
3.0 Satisfaction with neighbourhood as a place to live

‘How satisfied or dissatisfied are you with your neighbourhood as a place to live?’

Just over three quarters (76%) are satisfied with their neighbourhood as a place to live, 15% are dissatisfied.

Chart 3a: Satisfaction with neighbourhood as a place to live

<table>

<td>7.4%</td>
</tr>
</tbody>
</table>

Base: 1,000

Differences:
- Significantly more respondents aged 35-59 yrs (76%) and 60+yrs (81%) are satisfied with their neighbourhood as a place to live compared with those 34yrs and under (63%).
- Significantly more respondents aged 34yrs and under are dissatisfied with their neighbourhood as a place to live (21%) compared with those aged 60+yrs (11%).
- Significantly more Sheltered tenants are satisfied with their neighbourhood as a place to live (84%) compared with General Needs tenants (73%).
- Significantly more General Needs tenants are dissatisfied with their neighbourhood as a place to live (17%) compared with Sheltered tenants (8%).
Comparison with 2017 Housing Tenant Survey
No real statistically significant change from 2017 where three quarters (75%) were satisfied with their neighbourhood as a place to live, 15% were dissatisfied.
4.0 Rent and Service Charges

4.1 Satisfaction that rent provides value for money

‘How satisfied or dissatisfied are you that your rent provides value for money?’

87% are satisfied that their rent provides value for money, 8% are dissatisfied.

**Chart 4a: Satisfaction that rent provides value for money**

Base: 960

**Differences:**

- Significantly more respondents aged 60+yrs are satisfied that their rent provides value for money (91%) compared with those aged 35-59yrs (83%).

- Significantly more respondents where no household member has a health problem are satisfied that their rent provides value for money (89%) compared with those who have a household member who is limited a lot (82%).
Comparison with 2017 Housing Tenant Survey

An increase of 3.6% with regards those satisfied that rent provides value for money compared with 2017 where 83% were satisfied and 11% were dissatisfied.
4.2 Paying rent

‘How do you pay your rent?’

Chart 4d: How do you pay your rent?

The most common way in which tenants paid their rent was by Direct Debit (38%), over a third (34%) of the remaining respondents outlined ‘other’ i.e. a way which was not listed.

Of those who selected ‘other’, two thirds of them (66%) outlined their rent is paid via benefits or it is paid on their behalf. Of the remainder a number outlined they paid using a payment card or pink card either at the Post Office, Shop or through PayPoint.

Differences:

Age:
- Significantly more respondents aged 34yrs and under (15%) and 35-59yrs (11%) paid their rent by online payment compared with those 60+yrs (2%).
- Significantly more respondents aged 60+yrs paid their rent by Direct Debit (43%) compared to 34yrs and under (32%).
- Significantly more respondents aged 34yrs and under paid their rent by Telephone (14%) compared to those aged 35-59yrs (6%) and those aged 60+yrs (2%).
- Significantly more respondents aged 35-59yrs paid their rent at Cash Office (Gateway) (9%) compared to those aged 34yrs and under (3%).
• Significantly more respondents aged 60+yrs paid their rent using an ‘other’ method (40%) compared to those aged 35-59yrs (32%) and those aged 34yrs and under (27%).

Tenure:
• Significantly more General Needs tenants paid their rent by **online payment** (10%) compared with Sheltered tenants (2%).
• Significantly more Sheltered tenants paid their rent by **Direct Debit** (51%) compared with General Needs tenants (35%).

Household member limited with health problem:
• Where household member limited a lot due to a health problem significantly more likely to pay their rent using an ‘other’ method (48%) compared with those with household member limited a little (29%) or not at all (26%).
• Where household member limited a little or not at all due to a health problem significantly more likely to pay their rent using Direct Debit (47% and 43% respectively) compared with those with household member limited a lot (28%).
4.3 Satisfaction that service charges provide value for money

‘How satisfied or dissatisfied are you that your service charges provide value for money?’

74% are satisfied that their service charges provide value for money, 20% are dissatisfied.

Chart 4e: Satisfaction that service charges provide value for money

<table>
<thead>
<tr>

Base: 734

Differences:

- Significantly more respondents aged 60+yrs are satisfied that their service charges provide value for money (80%) compared with those 35-59yrs (71%) and those 34yrs and under (67%).

- Significantly more general needs tenants living in a house are satisfied that their service charges provide value for money (87%) compared with those general needs tenants living in a flat (67%) or a maisonette (66%).
Comparison with 2017 Housing Tenant Survey

No real statistically significant change from 2017 where 72% were satisfied that their service charges provided value for money and 21% were dissatisfied.
4.4 Advice and support

‘How satisfied or dissatisfied are you with the advice and support you receive from Southampton City Council regarding paying rent and service charges?’

82% are satisfied with the advice and support they receive from the Council, 10% are dissatisfied.

Chart 4f: Satisfaction with the advice and support from the Council regarding paying rent and service charges.

Base: 856

Differences:
- Significantly more respondents aged 60+yrs are satisfied with the advice and support they receive from the council regarding paying rent and service charges (88%) compared with those aged 35-59yrs (78%).
- Where household member limited a lot due to a health problems significantly more dissatisfied with the advice and support they receive from the council regarding paying rent and service charges (13%) compared with no health problems (7%).
5.0 Satisfaction with enquiries

How satisfied or dissatisfied are you with the way the Housing Service at Southampton City Council deals with your enquiries generally?

66% are satisfied with the way the Housing Service at Southampton City Council deals with enquiries generally, over a quarter (27%) are dissatisfied.

Chart 5: Satisfaction with the way Housing Service deals with your enquiries

<table>
<thead>

</tr>
</tbody>
</table>

Base: 962

Differences:

- Significantly more respondents aged 60+yrs are satisfied with the way the Housing Service deals with enquiries generally (72%) compared with those 35-59yrs (64%) and those 34yrs and under (56%).
- Where no health problem significantly more satisfied with the way the Housing Service deals with enquiries generally (70%) compared with those which are limited a lot (60%).
- Where household member limited a lot due to a health problem significantly more dissatisfied with the way the Housing Service deals with enquiries generally (33%) compared with no health problems (22%).

Comparison with 2017 Housing Tenant Survey

A decrease of 6% with regards those satisfied with the way the Housing Service deals with enquiries generally compared with 2017 where 72% were satisfied and 27% were dissatisfied.
6.0 Repairs and maintenance

6.1 Satisfaction with repairs and maintenance

‘Generally, how satisfied or dissatisfied are you with the way the Housing Service at Southampton City Council deals with repairs and maintenance?’

71% are satisfied with the way the Housing Service at Southampton City Council deals with repairs and maintenance, 22% are dissatisfied.

Chart 6a: Satisfaction with the way Housing Service deals with repairs and maintenance

Base: 978

Differences:

- Significantly more respondents aged 60+yrs are satisfied with repairs and maintenance (82%) compared with those 35-59yrs (67%) and those 34yrs and under (56%).

- Significantly more respondents aged 34yrs and under (33%) and 35-59yrs (25%) are dissatisfied with repairs and maintenance compared with those 60+yrs (14%).

- Significantly more males are satisfied with repairs and maintenance (76%) compared with females (68%).

- Significantly more females are dissatisfied with repairs and maintenance (24%) compared with males (18%).

- Significantly more Sheltered tenants are satisfied with repairs and maintenance (83%) compared with General Needs tenants (68%).
- Significantly more General Needs tenants are dissatisfied with repairs and maintenance (25%) compared with Sheltered tenants (14%).

Chart 6b: Satisfaction with repairs and maintenance by Tenure

Chart 6c: Satisfaction with repairs and maintenance by Age
Comparison with 2017 Housing Tenant Survey

No real statistically significant change from 2017 where 72% were satisfied with the way the Housing Service at Southampton City Council dealt with repairs and maintenance and 21% were dissatisfied.

6.2 Repairs in last 12 months

Around two thirds (66%) outlined they had a repair to their home in the last 12 months (Base: 1,000).

6.3 Last repair

For those who outlined that they had a repair in the last 12 months...

... ‘Thinking about the last repair completed, how satisfied or dissatisfied were you with the following?’

Chart 6b: Satisfaction with the following:

- 76% were satisfied with the ease of reporting the repair, 21% were dissatisfied.
- 79% were satisfied with being able to make an appointment convenient to them, 16% were dissatisfied.
- 78% were satisfied with the repair being completed first time, 17% were dissatisfied.
Differences:

- Significantly more respondents aged 60+yrs are satisfied with being able to make an appointment convenient to them (87%) compared with those 35-59yrs (78%) and those 34yrs and under (68%).

- Significantly more Sheltered tenants are satisfied with being able to make an appointment convenient to them (86%) compared with General Needs tenants (77%).

- Significantly more respondents aged 60+yrs are satisfied with the repair being completed first time (85%) compared with those 35-59yrs (75%).

- Significantly more General Needs tenants are dissatisfied with the repair being completed first time (19%) compared with Sheltered tenants (10%).

7.0 Satisfaction with views listened to and acted upon

‘How satisfied or dissatisfied are you that the Housing Service at Southampton City Council listens to your views and acts upon them?’

61% are satisfied that the Housing Service at Southampton City Council listens to their views and acts upon them, 30% are dissatisfied.

Chart 7: Satisfaction that the Housing Service listens to your views and acts upon them

Base: 813
Differences:

- Significantly more respondents aged 60+yrs are **satisfied** that the Housing Service at Southampton City Council listens to their views and acts upon them (69%) compared with those 35-59yrs (59%) and those 34yrs and under (49%).

- Significantly more respondents aged 34yrs and under are **dissatisfied** that the Housing Service at Southampton City Council listens to their views and acts upon them (39%) compared with those 60+yrs (25%).

- Where household member limited a lot due to a health problem significantly more **dissatisfied** that the Housing Service at Southampton City Council listens to their views and acts upon them (35%) compared with no health problems (25%).

**Chart 9b: Satisfaction Housing Service listens to your views and acts upon them by Tenure**
