## **SECTION 1: INTRODUCTION**

- 1.1 The purpose of the Draft Bassett Neighbourhood Plan (the Plan) is to guide future development and land use within the Plan area. A total of 12 policies and 2 recommendations have been published within the Plan to provide a focus on issues specific to the Bassett Neighbourhood Area. This Report has been completed as part of the Plan preparation process by providing information on the following;
  - Strategic Environmental Assessment (SEA) screening and Sustainability Appraisal (SA); and
  - Habitats Regulations Assessment (HRA) screening
- 1.2 A summary of the relevant findings and conclusions for the SEA screening and additional work undertaken through the SA assessment are provided in Section 2. Appendix 1 includes the detailed assessment sheets relating to the SA assessments. The findings and conclusions for the HRA screening exercise provided in Section 3.

# Strategic Environmental Assessment and Sustainability Appraisal

- 1.3 The basis for Strategic Environmental Assessments (SEA) legislation is European Directive 2001/42/EC and was transposed into English law by the Environmental Assessment of Plans and Programmes Regulations 2004, or SEA Regulations. Detailed Guidance of these regulations can be found in the Government publication 'A Practical Guide to the Strategic Environmental Assessment Directive' (ODPM 2005).
- 1.4 The National Planning Practice Guidance (NPPG) states that there is no legal requirement for a neighbourhood plan to have a sustainability appraisal as set out in Section 19 of the Planning and Compulsory Purchase Act 2004. However, it is further noted that a qualifying body must demonstrate how its plan will contribute to achieving sustainable development. Therefore, as well as meeting the legal requirements of undertaking SEA screening in order to see if the Plan requires a full assessment, this Report also includes the findings of an SA assessment for each of the policies and recommendations that have been published.

### The SEA/SA Process

1.5 The SEA process aims to ensure that likely significant sustainability and environmental effects arising from the Plan are identified, assessed, mitigated, communicated and monitored, and that opportunities for public involvement are provided. It enables environmental considerations to be accounted for in decision-making throughout the production of the Plan in an integrated way. The SA process further considers the social and economic as well as the environmental impacts of the Plan.

## SECTION 2: SEA SCREENING OPINION AND SA ASSESSMENT FINDINGS FOR THE DRAFT BASSETT NEIGHBOURHOOD LPAN

## SEA Screening

- 2.1 European Union Directive 200142/EC requires a Strategic Environmental Assessment to be undertaken for certain types of plans or programmes that would have a significant environmental effect. Southampton City Council (on behalf of the Bassett Neighbourhood Forum) has helped to determine whether an SEA is required. The Environmental Assessment of Plans and Programmes Regulations 2004 (the regulations) require that this is determined by a screening process, which should use a specified set of criteria (set out in Schedule 1 of the Regulations). The results of this process must be set out in an SEA Screening Statement, which must be publicly available. Before the Council make a formal determination, there is a requirement to consult three statutory consultation bodies designated in the regulations (English Heritage, Environment Agency & Natural England) on whether an environmental assessment is required.
- 2.2 Table 1 provides the Screening Determination of the need to carry out a Strategic Environmental Assessment for the Bassett Neighbourhood Plan. This has been made in accordance with the regulations and will be subject to consultation before Southampton City Council (on behalf of the Bassett Neighbourhood Forum) makes its determination on the necessity for a full Strategic Environmental Appraisal of the Neighbourhood Plan.

| Criteria for determining the likely<br>significance of effects (Annex II SEA<br>Directive)  | Likely to have<br>significant<br>environmental<br>effects | Summary of significant effects  |
|---|---|---|
| 1(a)the degree to which the Bassett<br>Neighbourhood Plan sets a<br>framework for projects and other<br>activities, either with regard to the<br>location, nature, size and operating<br>conditions or by allocating resources; | No  | There are no significant environmental effects arising from the policies in the Plan<br>that are likely to trigger full environmental assessment since it does not directly<br>influence the location, nature and scale of development proposals further to the<br>development allocations which have already been identified in the Amended Local<br>Plan Review (2010). |
| 1(b)the degree to which the<br>Bassett Neighbourhood Plan influences<br>other plans and programmes including<br>those in a hierarchy;   | No  | The Bassett Neighbourhood Plan will respond to rather than influence other plans<br>or programmes. It is at the lower end of the planning policy hierarchy which<br>consists of higher level plans such as the Amended Local Plan Review (2010) and<br>Adopted Core Strategy (2010).  |
| 1(c)the relevance of the Bassett<br>Neighbourhood Plan for the integration of<br>environmental considerations in particular<br>with a view to promoting sustainable<br>development;   | No  | The policies of the Bassett Neighbourhood Plan are not considered to have a significant environmental impact on the integration of environmental considerations.  |
| 1(d)environmental problems relevant to the Bassett Neighbourhood Plan;  | No  | The policies of the Bassett Neighbourhood Plan are unlikely to present any environmental problems.  |
| 1 (e)the relevance of the Bassett<br>Neighbourhood Plan for the<br>implementation of Community legislation<br>on the environment (for example, plans<br>and programmes linked to waste<br>management or water protection).      | No  | The policies of the Bassett Neighbourhood Plan are not considered to be relevant to the implementation of EC legislation.   |
| 2(a)the probability, duration, frequency and reversibility of the Bassett Neighbourhood Plan;   | No  | The policies of the Plan will be unlikely to have any irreversible damaging environmental impacts.  |
| (b)the cumulative nature of the effects of the Bassett Neighbourhood Plan;  | No  | The policies of the Plan will have no significant cumulative environmental effects.   |

Table 1: The Environmental Assessment of Plans and Programmes Regulations 2004: Schedule 1 – Criteria for determining the likely significance of effects on the environment

| Criteria for determining the likely<br>significance of effects (Annex II SEA<br>Directive)  | Likely to have<br>significant<br>environmental<br>effects | Summary of significant effects   |
|---|---|--|
| (c)the transboundary nature of the effects of the Bassett Neighbourhood Plan;   | No  | The policies of the Plan are not anticipated to have any significant environmental effects upon the Bassett Neighbourhood Area or upon other parts of the city including the adjacent Wards. |
| (d)the risks to human health or the<br>environment (for example, due to<br>accidents) of the Bassett Neighbourhood<br>Plan;   | No  | The policies of the Plan will have no significant risks to human health or the environment.  |
| (e)the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected);  | No  | The policies of the Plan will not have any significant environmental impacts that would affect the existing population or that beyond the Bassett Neighbourhood Area.                        |
| <ul> <li>(f)the value and vulnerability of the area likely to be affected due to:</li> <li>(i)special natural characteristics or cultural heritage;</li> <li>(ii)exceeded environmental quality standards or limit values; or (iii)intensive land-use; and</li> </ul> | No  | The policies of the Plan will not have any significant environmental effects upon these factors.   |
| g)the effects on areas or landscapes which<br>have a recognised national, Community or<br>international protection status   | No  | No significant environmental impact identified with there not being any sites of national, Community or international protection status within the Bassett Neighbourhood Area.               |

## **SEA Screening Outcome**

2.3 The assessment shown in Table 1 identifies no significant negative effects arising from the draft Bassett Neighbourhood Plan and as such, will not require a full SEA to be undertaken. This determination is pending the findings of consultation and the formal views of the statutory environmental bodies. One of the key factors relating the view of there being no significant negative effects can be attributed to there being no set development quantum within the Draft Bassett Plan. This view is also based on how the policies seek to reinforce and do not go outside or deviate from the remit of the existing Core Strategy and Local Plan policies whilst other policies provide a specific focus upon protection and enhancement.

## **Sustainability Appraisal Assessment**

2.4 Following on from paragraph 1.4, the concept of undertaking a Sustainability Appraisal is considered to be good practice so that a fuller range of social and economic factors can be considered against any environmental effects identified through the SEA screening. The SA screening exercise included in this Report is therefore intended to better inform decision makers on the sustainability aspects of the Plan and to ensure its full impact on sustainability is understood.

#### The SA framework

2.5 The SA framework consists of a series of objectives which have been used to further assess the policies of the Bassett Neighbourhood Plan (see Figure 2 below). The objectives were originally derived from those set out in the South East Regional Sustainability Framework and are considered to be consistent with the themes set out in Annex I of the SEA Directive that the SA should seek to address in terms of the impact upon them from implementation of the Plan.

## Figure 2: Sustainability Appraisal Objectives used to assess proposals in the Draft Bassett Neighbourhood Plan

| 1  | Ensure that everyone has the opportunity to live in a decent, well designed, sustainably constructed and affordable home.   |
|----|---|
| 2  | Reduce the risk of flooding and the resulting detriment to public well-being, the economy and the environment.  |
| 3  | Improve the health and well-being of the population and reduce inequalities in health.  |
| 4  | Reduce poverty and social exclusion and close the gap between the most deprived areas of the City and the rest of the region.   |
| 5  | Facilitate educational achievement levels across the City. Develop opportunities for everyone to acquire the skills needed to find and remain in work, to support long-term competitiveness of the City.                  |
| 6  | Create and sustain vibrant communities with reduced crime and fear of crime.  |
| 7  | Improve accessibility to and enhance services and facilities.   |
| 8  | Encourage increased engagement in cultural activity across all sections of the City's community. Support cultural events and sporting activities in the City's parks, commons and open spaces.                            |
| 9  | Improve efficiency in land use through the re-use of previously developed land<br>and existing buildings, including re-use of materials from buildings, and<br>encourage urban renaissance and improvements in townscape. |
| 10 | Reduce air pollution and ensure air quality continues to improve.   |
| 11 | Address the causes of climate change through reducing emissions of greenhouse gases and ensure that the City is prepared for its impacts.   |
| 12 | Conserve and enhance the City's biodiversity.   |
| 13 | Reduce road congestion and pollution levels by improving travel choice, promoting sustainable travel and reducing the need for travel by car/lorry.   |
| 14 | Encourage sustainable consumption and production by promoting sustainably produced local products.  |
| 15 | Reduce waste generation and achieve the sustainable management of waste.  |
| 16 | Maintain and improve the water quality of river, estuary, coastal and groundwater, and achieve sustainable water resources management.  |
| 17 | Increase energy efficiency, and the proportion of energy generated from renewable sources in the City.  |
| 18 | Facilitate high and stable levels of employment so everyone can benefit from economic growth and stimulate economic revival in priority regeneration areas.   |

| 19 | Develop a dynamic, diverse and knowledge-based economy that excels in       |
|----|---|
|    | innovation with higher value, lower impact activities.                      |
| 20 | Protect, enhance and make accessible for enjoyment, the City's green spaces |
|    | and historic environment.   |

#### **Consideration of Alternative Options**

2.6 Alternative options are largely considered in the context of the existing Development Plan through the policies of the current Amended Local Plan (2010), Core Strategy (2010) and other supporting documents where necessary with justification provided for why the preferred options have been chosen. Some of the alternatives have not been drawn from existing plan policies or have no specific protection of an existing use where this is considered to be necessary in drawing out a key issue. Table 3 provides an overview of how the alternatives and preferred options have been considered.

| <b>Table 2: Consideration of Alternative Option</b> | າຣ |
|---|----|
|---|----|

| Bassett<br>Neighbourhood Plan<br>Policy                                 | Summary of Preferred Option   | Summary of Alternative<br>Option 1   | Summary of Alternative<br>Option 2 |
|---|---|--|------------------------------------|
| Policy BAS 1 – New<br>Development (informed<br>by the Preferred Option) | To support the development of family<br>houses, including large family houses in<br>areas identified for low residential<br>densities. New developments other than<br>those detailed in the SHLAA, or any<br>development of existing garden land will<br>be required to undertake consultation with<br>and to take note of the views, of the local<br>community prior to the submission of a<br>planning application. | Policy CS 16 of the Core<br>Strategy also promotes a<br>wider housing mix. Reference<br>is also made to family homes<br>being 3 or more bedrooms in<br>Policy CS 16. This differs to<br>the 4+ bedrooms definition for<br>family homes within the<br>preferred option. |                                    |
| identified requirement for f  | l<br>ion for Policy BAS 1: The preferred option is<br>amily homes within the PUSH sub region as<br>being four bedrooms is also based on the So  | identified in the South Hampshire  | Strategy (October 2012). The       |
| Policy BAS 2 – Windfall<br>Sites (informed by the<br>Preferred Option)  | To support windfall sites provided they<br>conform to the density and character of<br>the area and surrounding property as per<br>policies BAS 3, BAS 4 and Policies CS 5<br>and CS 16 of the Core Strategy.  | No alternative options considered.   |                                    |
| -   | ion for Policy BAS 2: The preferred option is<br>also considered that the policy approach refle   |  |                                    |

| Bassett<br>Neighbourhood Plan<br>Policy                                      | Summary of Preferred Option   | Summary of Alternative<br>Option 1  | Summary of Alternative<br>Option 2 |
|--|---|---|------------------------------------|
| Policy BAS 3 – Character<br>and Design (informed by<br>the Preferred Option) | To ensure that new development takes<br>account of the existing character within<br>the context of the street scene by meeting<br>a number of set criteria. This approach<br>would be similar to that of Policies SDP 6<br>Urban Design Principles and SDP 7<br>Context of the Amended Local Plan<br>Review (2010). It is also similar to<br>elements of Policy CS 13 – Fundamentals<br>of Design of the Core Strategy. | No alternative options<br>considered.   |                                    |
| Amended Local Plan Revi  | ion for Policy BAS 3: The preferred option is<br>ew (2010) and Policy CS 13 of the Core Stra<br>be addressed. It is also considered that the<br>in this instance.   | tegy. It is also justified in this insta  | ance since it would allow for      |
| Policy BAS 4 – Housing<br>Density (informed by the<br>Preferred Option)      | <ul> <li>To outline the following densities to be applied to new development within the Bassett Neighbourhood Area:</li> <li>Low density - below 35 dwellings per hectare</li> <li>Medium density - 35 to 50 dwellings per hectare</li> <li>High density - Over 50 dwellings per</li> </ul>   | <ul> <li>Policy CS 5 Housing Density<br/>of the Core Strategy (2010)<br/>has higher density levels to<br/>that proposed in the preferred<br/>option:</li> <li>Low density = 35 - 50<br/>dwellings per hectare<br/>(applicable to much of the<br/>Bassett Ward currently)</li> <li>Medium density - 50 to 100</li> </ul> |                                    |

| Bassett<br>Neighbourhood Plan<br>Policy             | Summary of Preferred Option   | Summary of Alternative<br>Option 1   | Summary of Alternative<br>Option 2                                 |
|---|---|--|--|
|   | hectare   | dwellings per hectare  |  |
|   |   | <ul> <li>High density – Over 100<br/>dwellings per hectare</li> </ul>          |  |
| Preferred Option Justificat                         | ion for Policy BAS 4: The preferred option is   | justified in that it will be more loca   | Ily distinctive towards dealing                                    |
|   | vithin the Bassett Neighbourhood Area. It is c  |  |  |
|   | er detached family homes for which there is a   | an identified demand not just withi  | n the Bassett Neighbourhood  |
| Area but throughout the ci                          | ty and wider PUSH sub region as a whole.  |  |  |
| Policy BAS 5 – Houses                               | To state that changes of use to houses in   | Apply the 10% threshold to the   |  |
| of Multiple Occupation                              | multiple occupation (HMO) will only be  | entire Bassett Neighbourhood   |  |
| (informed by the                                    | permitted where a number of criteria are  | Area.  |  |
| Preferred Option)                                   | met. This approach would be similar to  |  |  |
|   | that of Policy H 4 Houses of Multiple   |  |  |
|   | Occupation of the Amended Local Plan  |  |  |
|   | Review (2010) in relation to inclusion of   |  |  |
|   | the character and amenity criteria. It is   |  |  |
|   | also in accordance with Policy CS 16 -  |  |  |
|   | Housing Mix and Type of the Core  |  |  |
|   | Strategy (2010) and the HMO SPD   |  |  |
|   | (2012).   |  |  |
| the Amended Local Plan F<br>Bassett Neighbourhood A | ion for Policy BAS 5: The preferred option is<br>Review (2010) and the HMO SPD (2012). The<br>rea (rather than to residential properties when<br>rnatively for a minimum of 10 residential prop | e alternative option of applying the<br>re their curtilage lies wholly or part | e 10% threshold to the entire<br>tly within a 40 metre radius from |
|   | et address) is not considered to be appropriat  |  |  |
|   |   |  |  |

| Bassett<br>Neighbourhood Plan<br>Policy                                      | Summary of Preferred Option   | Summary of Alternative<br>Option 1  | Summary of Alternative<br>Option 2 |  |  |
|--|---|---|------------------------------------|--|--|
| population from living in a  | decent and affordable home.   |   |                                    |  |  |
| Policy BAS 6 – Highways<br>and Traffic (informed by<br>the Preferred Option) | To include reference to proposals to<br>protect and mitigate against the impact of<br>traffic within residential areas and that<br>they will be supported in accordance with<br>a number of suggested measures. This<br>approach would generally conform with<br>principles that are included in Policy SDP<br>11 of the Amended Local Plan Review<br>(2010) and Policy CS 18 of the Core<br>Strategy (2010). The preferred approach<br>would also restrict vehicular access points<br>onto specifically named roads as a road<br>safety measure. | Policy TI 2 Vehicular Access of<br>the Local Plan is a more<br>general policy for preventing<br>vehicular access from<br>specifically named roads to the<br>preferred option which<br>identifies specific roads onto<br>which vehicular access points<br>would be restricted. |                                    |  |  |
| Amended Local Plan Revie   | Preferred Option Justification for Policy BAS 6: The preferred option is considered to be in general accordance with the approach of the<br>Amended Local Plan Review (2010) and Core Strategy. It is also considered to be more locally distinctive in terms of identifying streets<br>with particular traffic problems.   |   |                                    |  |  |
| Policy BAS 7 –Bassett<br>Green Village                                       | To retain the status and character of this<br>Conservation Area with any development<br>being sympathetic to the design and<br>character of the surrounds. This approach<br>would generally be in line with Policy HE<br>1 of the Amended Local Plan Review<br>(2010).  | No alternative options considered.  |                                    |  |  |

| Bassett<br>Neighbourhood Plan<br>Policy | Summary of Preferred Option   | Summary of Alternative<br>Option 1   | Summary of Alternative<br>Option 2 |
|---|---|--|------------------------------------|
|   | ion for Policy BAS 7: The preferred option co<br>I Plan Review (2010). It is also considered the<br>be tested in this instance.   | •  |                                    |
| Policy BAS 8 – Trees                    | Policy BAS 8 protects and retains trees.<br>This approach is generally in line with<br>Policies SDP 12 Landscape and<br>Biodiversity and NE 6 Protection /<br>Improvement of Character of the Local<br>Plan | No alternative options<br>considered.  |                                    |
| Preferred Option Justificat             | ion for Policy BAS 8: The preferred option co   | onsolidates upon the approach of I   | Policies SPD 12 and NE 6 of the    |
| Amended Local Plan Revie                | ew (2010). It is also considered that the polic   | cy approach reflects the NPPF and  | that no further alternative        |
| options need to be tested i             | in this instance.   |  |                                    |
| Policy BAS 9 –Grass<br>Verges           | Policy BAS 9 protects and retains grass verges  | Alternative is to not consider<br>the specific protection of grass<br>verges with these not being<br>given direct consideration in<br>the Local Plan and Core<br>Strategy. |                                    |

|---|--|---|------------------------------------|--|--|--|--|--|
| Policy BAS 10 – Local<br>Shops  | Policy BAS 10 will maintain local shops in<br>Copperfield Road as a local amenity.   | The identification of<br>Copperfield Road in Policy<br>BAS 10 expands upon Policy<br>REI 6 of the Local Plan and<br>Policy CS 3 – Town, district<br>and local centres, community<br>hubs and community facilities<br>of the Core Strategy with this<br>parade of shops not previously<br>being identified for protection. |                                    |  |  |  |  |  |
| within the Copperfield Roa<br>the purposes of the Ameno<br>parade of shops. The appr<br>this instance in not protect<br>value to local people. How<br>changes to permitted deve   | Preferred Option Justification for Policy BAS 10: The preferred option would allow for the protection of the existing shops and services within the Copperfield Road local shopping parade for meeting the needs of local residents. The nearest protected shopping centre for the purposes of the Amended Local Plan Review (2010) and Core Strategy (2010) is located over 800 metres walking distance from the parade of shops. The approach is also considered to be justified in terms of the high occupancy rate. Maintaining the current approach in this instance in not protecting this local shopping parade could therefore potentially result in the loss of shops and services which are of value to local people. However, any policy for protecting the shops and services will need to be considered against the Government's changes to permitted development rights which currently allow changes of use from retail to residential under a new Class IA and from retail to banks and building societies under a new class CA. |   |                                    |  |  |  |  |  |
| Policy BAS 11 -To retain Hollybrook Industrial Estate as<br>an employment site. This would follow on<br>from the approach of Policy REI 11 of the<br>Amended Local Plan Review (2010) and<br>Policy CS 7 of the Core Strategy.To not protect Hollybrook as<br>an employment site. |  |   |                                    |  |  |  |  |  |
| -   | Preferred Option Justification for Policy BAS 11: The preferred option consolidates upon policy CLT 8 of the Amended Local Plan Review (2010). A recent survey also shows how the industrial estate has a high occupancy rate which would justify the continued protection of  |   |                                    |  |  |  |  |  |

| this industrial estate. The a   | alternative option for not protecting this site fo  | or employment is therefore not cor | nsidered to be appropriate.        |
| Policy BAS 12 –<br>Southampton Sports<br>Centre and Southampton<br>City Golf Course | To protect Southampton Outdoor Sports<br>Centre and Southampton City Golf<br>Course as well as retain the public open<br>space. Any proposal for development of<br>sports and related facilities will need to be<br>subject to rigorous, City-wide public<br>consultation. This approach would follow<br>on from Policy CLT 8 Southampton<br>Sports Centre (including Municipal Golf<br>Course) of the Amended Local Plan<br>Review (2010) through the safeguarding<br>of Southampton Outdoor Sports Centre<br>and Southampton City Golf Course and<br>allowing proposals which would upgrade<br>the existing sports facilities | No not protect the sports ground.  |                                    |
| Amended Local Plan Revie  | ion for Policy BAS 12: The preferred option is<br>ew (2010). The approach for not protecting the<br>s of a valuable community facility which serve  | ne sports ground is not considered | -                                  |

## Overview of Effects Identified through the Sustainability Appraisal Assessment

2.7 Table 3 provides a summary of the effects identified through the SA process for each of the proposed policies and for the two recommendations. A detailed assessment of each policy against the sustainability objectives of the Sustainability Appraisal Framework (as shown in Figure 2 on page 8) is included in Appendix 1.

Table 3: Compatibility of the Proposed Bassett Neighbourhood Plan Policies against the Sustainability Objectives

| Neighbourhood | Sustainability Objectives |   |   |   |   |   |   |   |   |    |    |    |    |    |    |    |    |    |    |    |
|---------------|---------------------------|---|---|---|---|---|---|---|---|----|----|----|----|----|----|----|----|----|----|----|
| Plan Policy   | 1                         | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |

# Compatibility of Proposed Bassett Plan Policies against the Sustainability Objectives - Summary of Key Findings

2.8 Table 3 shows that the plan will have a number of positive effects against the sustainability objectives of the Sustainability Appraisal Framework. It also shows a number of uncertain effects. A summary of the key findings for each policy is now provided below and are also included as part of the detailed assessments which form Appendix 1. Mitigation and enhancement measures where these are considered to be necessary are also further included in Appendix 1.

### **BAS 1 – New Development**

2.9 The policy would encourage a decent residential environment and would be in line with the PUSH strategy in delivering family housing which is defined as having 4 or more bedrooms. The main concern of this policy relates to the uncertainty identified through a potential gentrification of communities. Further to the mitigation provided by Policies CS 15 and CS 16 of the Core Strategy, it may be necessary for alternative policies or policy criteria to be included in the Plan to take account of a wider range of housing needs.

## **BAS 2 – Windfall Sites**

2.10 The policy is continuing along the lines of the Core Strategy whereby windfall sites are promoted as an acceptable contribution towards the overall housing supply within the city. It is not known how many opportunities could come forward over the period of the Plan further to those sites which have been identified through the 2013 SHLAA. However, should such opportunities arise, they should be planned for appropriately, with sites coming forward in the medium and higher density areas being allowed to cater for the recommended density range in these areas if considered appropriate against other planning considerations. It should also be noted that the uncertain effects identified above can be appropriately eliminated for through the noted mitigation measures (i.e. other policies of the Local Plan, Core Strategy and this Plan).

## BAS 3 – Character and Design

2.11 The policy will help towards achieving developments which are well designed and take account of the character of the existing neighbourhood. However, it will be necessary to ensure that criteria c would not prevent appropriate development proposals for medium and high density developments in these areas as noted above.

## **BAS 4 – Housing Density**

2.12 It is acknowledged that the identified low density areas will help towards retaining the character of existing neighbourhoods in relation to Policy BAS 3 Character and Design. However, it will be important for the Policy BAS 4 Residential Density to counter balance the requirement for lower densities in the lower density areas through higher density developments being permitted in the higher density areas. This will help towards ensuring that the Plan takes account of its share of residential development in the northern part of the city over the Plan period.

## **BAS 5 – Houses of Multiple Occupation**

2.13 The policy is considered to be similar to Policy H 4 Houses of Multiple Occupation of the Local Plan in respect of the amenity and character related criteria. It is acknowledged that the application of the thresholds allows for a fine balance in allowing HMOs proposals in circumstances where these (as also applied through the HMO SPD) are met and for the vibrancy of existing communities to be sustained in respect of continued pressures for this particular type of housing. Overall, the policy is considered to strike a

good balance and is therefore considered to have positive effects. However, it is important to note that the policy would score negatively if criteria e or any other of the criteria within the policy was used as a tool to refuse all HMO proposals irrespective of the thresholds.

## BAS 6 – Highways and Traffic

2.14 Traffic congestion and related environmental impacts are noted to be a particular issue during the morning and evening peak rush hour periods along the main routes running through the Bassett Neighbourhood Area. It is considered that the policy, particularly with reference to criteria e and sustainable travel plans being promoted to the staff at Southampton General Hospital and The University of Southampton would help towards reducing private car use. However, the traffic calming and traffic mitigation proposals included in the policy may not be significant enough to ameliorate these traffic related issues on their own without public transport measures and behavioural changes. However, it is acknowledged that behavioural change is a wider issue to that which the Bassett Neighbourhood Plan will be able to deal with.

## BAS 7 – Bassett Green Village

2.15 The policy would continue the approach of the Local Plan and Core Strategy through providing continued protection to the Conservation Area status of Bassett Green Village. Positive effects have therefore been identified through the SA assessment.

## **BAS 8 – Trees**

2.16 The policy would expand upon the approach of Policies NE 6 Protection / Improvement of Character and SDP 12 Landscape and Biodiversity of the Local Plan with specific coverage to the protection of trees of good arboricultural and amenity value throughout the Bassett Neighbourhood Area. It will be important for this policy to be considered alongside these Local Plan and Core Strategy policies in order to ensure maximum protection to the natural green environment and its assets.

## BAS 9 – Grass Verges

2.17 The policy would expand upon the approach of Policies NE 6 Protection / Improvement of Character and SDP 12 Landscape and Biodiversity of the Local Plan by providing specific coverage to the protection of grass verges throughout the Bassett Neighbourhood Area. However, it is important to note that the policy will only be beneficial where grass verges are included within the red line boundary of any submitted planning application. It will be important for this policy to be considered alongside these Local Plan and Core Strategy policies in order to ensure maximum protection to the natural green environment and its assets.

## BAS 10 – Local Shops

2.18 The protection of local shops in Copperfield Road would expand upon the approaches of Policy REI 6 Local Centres of the Local Plan and Policy CS 3 – Town, district and local centres, community hubs and community facilities of the Core Strategy. This is because Copperfield has not previously been identified as a local shopping centre within the existing statutory planning framework. However, it is important to note that whilst the benefits of retaining the local shops in Copperfield Road are recognised, this also needs to be considered against changes to permitted development rights being made at the national level. This is because change to the Use Class Order which have applied since 6<sup>th</sup> April 2014 allow permitted development rights for retail (under 150 m2) to be changed to residential use under a new Class IA and to other uses such as B1a. However, there is further uncertainty as to how permanent these measures will be with it being possible

that these recent changes to the use class order could be changed again over the course of the Plan period.

## **BAS 11 – Business and Industry**

2.19 The retention of Hollybrook Industrial Estate will be important for the local economy with this being the only such protected employment site within the Bassett Neighbourhood Area. Its retention will help to provide a wider range of jobs such as for those in skilled and manufacturing trades. The policy will need to be considered alongside REI 11 Light Industry of the Local Plan (where it is referred to as Northbrook Industrial Estate) and Policy CS 7 Safeguarding Employment Sites of the Core Strategy and the associated criteria of this policy.

# BAS 12 – Southampton Sports Centre and Southampton City Golf Course

2.20 The retention of the Southampton Sports Outdoor Centre and Southampton City Golf Course would help towards the continued protection of an important facility which serves the wider community within the city as well as residents within the Bassett Neighbourhood Area. The policy is considered to be positive in this respect especially when taking into account previous objections made through the Local Plan Review consultation prior to its adoption in 2006 whereby enabling residential development was proposed on part of the site.

### **BASR 1 – South Hill Reservoir**

2.21 The redevelopment of the South Hill Reservoir site would have positive effects particularly in relation to the provision of additional housing within the area. This is considered to be a particularly important site in contributing towards housing delivery within the northern part of the city. The site has been identified in the 2013 SHLAA for an indicative total of 70 dwellings over the 2022-2026 period. However, there is underlying uncertainty regarding the deliverability of the site over the period of the Bassett Neighbourhood Plan. Future updates made to the SHLAA will reflect the latest position regarding whether the site will be deliverable within the current anticipated timeframe.

### BASR 2 – Drainage

2.22 The recommendation would help towards the ensuring the provision of adequate drainage infrastructure for new residential development within the Bassett Neighbourhood Area.

### **Cumulative Effects**

2.23 It is considered that the cumulative impact of the Plan's policies and proposals should not give rise to any significant environmental effects against the identified sustainability objectives. Positive effects of a cumulative nature are however identified such as through Sustainability Objective 20 whereby a number of policies will in combination help to protect and enhance green and open spaces within the Bassett Neighbourhood Area.

### **Overall Summary of Findings**

2.24 Pending the uncertain effects being dealt with, the Plan is mostly sustainable and will contribute towards a number of sustainable development objectives.

#### SECTION 3: HABITAT SCREENING ASSESSMENT

## REGULATIONS

## ASSESSMENT

### **HRA Process**

- 3.1 The HRA process is generally divided into three stages as outlined below;
  - 1 Screening
  - 2 Appropriate Assessment
  - 3 Mitigation Measures
- 3.2 The initial screening stage determines if there are any likely significant effects possible as a result of the implementation of the plan and if an appropriate assessment is needed. It should provide a description of the plan and an identification of the Natura 2000 sites which may be affected by the plan and assess the significance of any possible effects on the identified sites.

### **Relevant Natura 2000 sites**

- 3.3 There are a number of Special Protection Areas (SPA)/RAMSAR and Special Area of Conservation (SAC) designated sites which have been considered within the scope of the Core Strategy and Core Strategy Partial Review HRA work. These include;
  - Chichester and Langstone Harbours SPA/Ramsar site
  - Emer Bog SAC
  - New Forest SAC/SPA/Ramsar
  - Portsmouth Harbour SPA/Ramsar
  - River Itchen SAC
  - Solent Maritime SAC
  - Solent and Southampton Water SPA/Ramsar
- 3.4 The HRA screening assessment therefore needs to identify if any likely significant effects will be caused on any of the identified Natura 2000 sites by the implementation of the policies in the Draft Bassett Neighbourhood Plan. Details of the habitats and typical species present within each of the identified Natura 2000 sites are provided below.

#### **Chichester and Langstone SPA**

#### <u>Breeding</u>

- Little Tern Sterna albifrons
- Common Tern Sterna hirundo
- Sandwich Tern Sterna sandvicensis

Overwintering

- Bar-tailed Godwit Limosa lapponica
- Pintail Anas acuta
- Shoveler Anas clypeata
- Eurasian Teal Anas crecca
- Wigeon Anas penelope
- Turnstone Arenaria interpres
- Dark-bellied Brent Goose Branta bernicla bernicla
- Sanderling Calidris alba
- Dunlin Calidris alpina alpina
- Ringed Plover Charadrius hiaticula
- Red-breasted Merganser Mergus serrator

- Eurasian Curlew Numenius arquata

- Grey Plover Pluvialis squatarola

- Shelduck Tadorna tadorna

- Redshank Tringa totanus

Bird Assemblage

- Over winter the area regularly supports 93,230 individual waterfowl (5yr peak mean 1998)

#### Chichester and Langstone Ramsar

Criterion 1

- Two outstanding estuarine basins, the site includes intertidal mudflats, saltmarsh, sand and shingle spits and sand dunes

Criterion 5

- Winter assemblage of 76,480 waterfowl (5 year peak mean 1998/99 - 2002/03)

Criterion 6

Breeding

- Little Tern Sterna albifrons albifrons

**Overwintering** 

- Dark-bellied Brent Goose Branta bernicla bernicla
- Dunlin Calidris alpina alpina
- Grey Plover Pluvialis squatarola
- Common Shelduck Tadorna tadorna

On passage

- Ringed Plover Charadrius hiaticula
- Black-tailed Godwit Limosa limosa islandica

- Common Redshank Tringa totanus totanus

#### Emer Bog SAC

Annex I Habitat

- Transition mires and quaking bogs.

#### New Forest Ramsar

Criterion 1

Valley mires and wet heaths are found throughout the site and are of outstanding scientific interest. The mires and heaths are within catchments whose uncultivated and undeveloped state buffer the mires against adverse ecological change. This is the largest concentration of intact valley mires of their type in Britain

Criterion 2

Diverse assemblage of wetland plants and animals including several nationally rare species. Seven species of nationally rare plant are found on the site, as are at least 65 British Red Data Book species of invertebrate

Criterion 3

The mire habitats are of high ecological quality and diversity and have undisturbed transition zones. The invertebrate fauna of the site is important due to the concentration of rare and scare wetland species. The whole site complex, with its examples of seminatural habitats is essential to the genetic and ecological diversity of southern England

#### **New Forest SAC**

#### Annex I Habitat

- Oligotrophic waters containing very few minerals of sandy plains (Littorelletalia uniflorae)

- Oligotrophic to mesotrophic standing waters with vegetation of the Littorelletea uniflorae and/or of the Isoëto-Nanojuncetea

- Northern Atlantic wet heaths with Erica tetralix
- European dry heaths
- Molinia meadows on calcareous, peaty or clayey-silt-laden soils (Molinion caeruleae)
- Depressions on peat substrates of the Rhynchosporion

- Atlantic acidophilous beech forests with Ilex and sometimes also Taxus in the shrublayer (Quercion robori-petraeae or Ilici-Fagenion)

- Asperulo-Fagetum beech forests
- Old acidophilous oak woods with Quercus robur on sandy plains
- Bog woodland \*

- Alluvial forests with Alnus glutinosa and Fraxinus excelsior (Alno-Padion, Alnion incanae, Salicion albae) \*

- Transition mires and quaking bogs.

- Southern damselfly Coenagrion mercuriale
- Stag beetle Lucanus cervus
- Great crested newt Triturus cristatus

#### **New Forest SPA**

#### **Breeding**

- Nightjar Caprimulgus europaeus
- Woodlark Lullula arborea
- Honey Buzzard Pernis apivorus
- Dartford Warbler Sylvia undata
- Overwintering

- Hen Harrier Circus cyaneus

#### Portsmouth Harbour Ramsar

Criterion 3

- Species assemblage of importance to maintaining biogeographic biodiversity

- Criterion 6
- Overwintering

- Dark-bellied Brent Goose Branta bernicla bernicla

#### Portsmouth Harbour SPA

#### Overwintering

- Dark-bellied Brent Goose Branta bernicla bernicla
- Dunlin Calidris alpina alpina
- Black-tailed Godwit Limosa limosa islandica
- Red-breasted Merganser Mergus serrator

#### River Itchen SAC

Annex I Habitat

- Water courses of plain to montane levels with the *Ranunculion fluitantis* and *Callitricho-Batrachion* vegetation

#### Annex II Species

- White-clawed (or Atlantic stream) crayfish Austropotamobius pallipes
- Southern damselfly Coenagrion mercuriale
- Bullhead Cottus gobio
- Brook lamprey Lampetra planeri
- Otter Lutra lutra
- Atlantic salmon Salmo salar.

#### **Solent Maritime SAC**

Annex I Habitat

- Estuaries
- Spartina swards (Spartinion maritimae)
- Atlantic salt meadows (Glauco-Puccinellietalia maritimae)
- Sandbanks slightly covered by sea water all the time
- Mudflats and sandflats not submerged at low tide
- Annual vegetation drift lines
- Perennial vegetation of stony banks
- Salicornia and other annuals colonising mud and sand
- Shifting white dunes with Ammophila arenaria
- Coastal lagoons

Annex II Species

- Desmoulin's whorl snail Vertigo moulinsiana

#### Solent and Southampton Water Ramsar

Criterion 1

- Several outstanding wetland habitat types, including unusual double tidal flow, a major sheltered channel, saline lagoons, saltmarshes, estuaries, intertidal flats, shallow coastal waters, grazing marshes, reedbeds, coastal woodland and rocky boulder reefs Criterion 2

Criterion 2

- Nationally rare species assemblage

Criterion 5

- Winter assemblage of 51,343 waterfowl (5 year peak mean 02/03)

Criterion 6

Breeding

- Sandwich Tern Sterna sandvicensis
- Common Tern Sterna hiruno
- Little Tern Sterna albifrons
- Roseate Tern Sterna dougallii

#### **Overwintering**

- Black-tailed Godwit Limosa limosa islandica
- Dark-bellied Brent Goose Branta bernicla bernicla
- Teal Anas crecca

#### Solent and Southampton Water SPA

#### Breeding

- Little Tern Sterna albifrons
- Sandwich Tern Sterna sandvicensis
- Common Tern Sterna hirundo

Mediterranean Gull Larus melanocephalus
Roseate Tern Sterna dougallii
<u>Overwintering</u>
Black-tailed Godwit Limosa limosa islandica
Dark-bellied Brent Goose Branta bernicla bernicla
Ringed Plover Charadrius hiaticula
Teal Anas crecca
<u>Bird Assemblage</u>
Over winter the area regularly supports 51,361 individual waterfowl (5 year peak mean 1998)

3.5 Before going on to look at the impact of the draft Plan policies on the identified Natura sites, a summary of the identified effects arising from the Core Strategy is provided in Table 4. This provides a background to HRA work undertaken previously for Southampton which also therefore covers the Bassett Neighbourhood Area.

Table 4: Summary of Impacts and Likely Significant Effects (alone and in combination with other plans) for International Sites identified through the Policies of the Adopted Core Strategy

| International<br>Site     | Nature of impact                                    | Likely significant effects as a result<br>of Core Strategy policies | Mitigation needed as a result of Core<br>Strategy policies? |  |
|---------------------------|---|---|---|--|
| Solent and<br>Southampton | Recreation Disturbance                              | Uncertain   | Yes   |  |
| Water SPA                 | Coastal Squeeze                                     | Uncertain   | Yes   |  |
|                           | Water Quality Impacts                               | No  | Precautionary mitigation required                           |  |
|                           | Water resource availability                         | No  | Precautionary mitigation required                           |  |
|                           | Disturbed flight lines /<br>ecological connectivity | Unknown   | Precautionary mitigation required                           |  |
|                           | Pollution (chemical, noise, light, air and dust)    | Unknown   | Precautionary mitigation required                           |  |
| Solent and Southampton    | Recreation Disturbance                              | Uncertain   | Yes   |  |

3.6 Further to Table 4, HRA screening has been undertaken on the Core Strategy Partial Review whereby revised policies relating to office and retail targets have been assessed to have an effect, but with the likelihood of there being no significant effect upon European sites either alone or in combination with other elements of the same plan, other plans or projects.

#### **HRA Screening Assessment**

3.7 Table 5 considers each of the policies within the draft Bassett Neighbourhood Plan and assesses whether there is a likely significant impact, direct of indirect (e.g. through construction and use of development such as increases in noise, light and dust pollution, water quality and resources and increased recreational disturbance) from these policies on each of the identified Natura 2000 sites listed on pages 22 to 26.

| Policy | Comment   | Nature of Impact   | Likely Significant Effect<br>on identified SAC, SPA | Mitigation Needed? |
|--------|---|--|---|--------------------|
|        |   |  | and Ramsar Sites                                    |                    |

## HRA Screening Outcome

- 3.8 The assessment in Table 6 shows that there are unlikely to be any significant environmental effects arising from the Draft Bassett Neighbourhood Plan further to those which were covered by the HRA undertaken for the Core Strategy. The main reason for this is because none of the policies relate to new land use designations or changes in development quantum further to what has been identified through the Local Plan and Core Strategy. Therefore, it is considered that a full Appropriate Assessment is not required. This screening opinion is pending consideration from the statutory consultation bodies1.
- 3.9 Further to the above screening opinion being formally determined and based on initial work undertaken by the Solent Disturbance Mitigation Project Group (SDMP), Southampton City Council has recently published a procedure note to accompany a Draft Unilateral Undertaking for SDMP Contributions. It is important to note that this will apply to all residential units that are built within the Bassett Neighbourhood Area and the rest of the city. The only exception to this charge will be one bedroom flats within the city centre. Further details relating to this charge are included in the Southampton.gov.uk/s-environment/policy/solent%20disturbance%20and%20mitigation%20project.aspx

<sup>&</sup>lt;sup>1</sup> In England, the consultation bodies are English Heritage, Natural England and the Environment Agency.

| SAO | bjective   | Short-term | Medium-term | Long-term | Likelihood | Scale | Performance |  | proposed in the Plan or within<br>the Amended Local Plan<br>Review (2010) and/or Adopted<br>Core Strategy (2010)  |
| 1   | Ensure that everyone<br>has the opportunity to<br>live in a decent, well<br>designed, sustainably<br>constructed and<br>affordable home. | +          | +           | +         | High       | Local | Permanent   | The focus of the policy upon<br>family homes, including the<br>provision of large detached<br>family homes would be in<br>line with the PUSH strategy<br>in delivering family housing<br>which is defined as having 4<br>or more bedrooms. | Policies CS 15 – Affordable<br>Housing and CS 16 – Housing<br>Mix and Type of the Core<br>Strategy will help to ensure<br>that a wide range of homes<br>are delivered. It will be<br>important for the Bassett<br>Neighbourhood Plan to take<br>account of the wider range of<br>housing needs in order to<br>ensure everybody has the<br>opportunity to live in a decent,<br>well designed, sustainably<br>constructed and affordable<br>home. |

| Deve | cy BAS 1 – New<br>elopment   |            | Ass         | essme     | nt of E    | ffect |             | Evidence and Reference   | Suggested Mitigation and<br>Enhancement Measure<br>(those in italics are already  |
|------|--|------------|-------------|-----------|------------|-------|-------------|--|---|
| SA O | bjective   | Short-term | Medium-term | Long-term | Likelihood | Scale | Performance |  | proposed in the Plan or within<br>the Amended Local Plan<br>Review (2010) and/or Adopted<br>Core Strategy (2010)  |
| 4    | Reduce poverty and<br>social exclusion and<br>close the gap between<br>the most deprived areas<br>of the City and the rest of<br>the region. | ?          | ?           | ?         | High       | Local | Permanent   | The focus of the policy on<br>the provision of large<br>detached family homes<br>could lead to uncertain<br>effects relating to social<br>exclusion. Only those with<br>greater capital expenditure<br>would be able to afford these<br>properties which in turn<br>could lead to a potential<br>gentrification of<br>communities. | Policies CS 15 – Affordable<br>Housing and CS 16 – Housing<br>Mix and Type of the Core<br>Strategy will help to ensure<br>that a wide range of homes<br>are delivered. It will also be<br>important for a wider range of<br>housing needs to be<br>considered within alternative<br>policies or policy criteria in the<br>Plan. |
| 6    | Create and sustain<br>vibrant communities with<br>reduced crime and fear<br>of crime   | ÷          | +           | ÷         | High       | Local | Permanent   | The provision of large<br>detached family homes is<br>likely to attract those with<br>greater capital expenditure<br>which in turn could an<br>indirect positive effect upon<br>creating and sustaining<br>vibrant communities.  |   |

| Dev  | cy BAS 1 – New<br>elopment   |            | Ass         | essme     | nt of E    | ffect |             | Evidence and Reference   | Suggested Mitigation and<br>Enhancement Measure<br>(those in italics are already   |
|------|--|------------|-------------|-----------|------------|-------|-------------|--|--|
| SA O | bjective   | Short-term | Medium-term | Long-term | Likelihood | Scale | Performance |  | (Those in Thancs are already<br>proposed in the Plan or within<br>the Amended Local Plan<br>Review (2010) and/or Adopted<br>Core Strategy (2010) |
| 9    | Improve efficiency in land<br>use through the re-use of<br>previously developed<br>land and existing<br>buildings, including re-<br>use of materials from<br>buildings, and encourage<br>urban renaissance and<br>improvements in<br>townscape | +          | +           | +         | High       | Local | Permanent   | The policy would allow for<br>the development of sites<br>which are identified in the<br>2013 SHLAA. This would<br>have a direct benefit upon<br>improving efficiency in land<br>use through the re-use of<br>previously developed land at<br>the South Hill Reservoir site,<br>Chamberlain Halls / Bassett<br>House and 446 – 448<br>Winchester Road and<br>Abingdon Gardens sites. |  |
| 19   | Develop a dynamic,<br>diverse and knowledge-<br>based economy that<br>excels in innovation with<br>higher value, lower<br>impact activities  | +          | +           | +         | Medium     | Local | Permanent   | The policy could have an indirect positive effect upon supporting a dynamic knowledge based economy with those who have higher level qualifications and skills being more likely to afford large detached family homes.  |  |

| Policy BAS 1 – New<br>Development   |                           | Assessme | nt of Ef   | ffect |             | Evidence and Reference | Suggested Mitigation and<br>Enhancement Measure<br>(those in italics are already                                 |  |  |
|---|---------------------------|----------|------------|-------|-------------|------------------------|--|--|--|
| SA Objective  | Short-term<br>Medium-term |          | Likelihood | Scale | Performance |                        | proposed in the Plan or within<br>the Amended Local Plan<br>Review (2010) and/or Adopted<br>Core Strategy (2010) |  |  |
| <b>Summary:</b> The policy would encourage a decent residential environment and would be in line with the PUSH strategy in delivering family housing which is defined as having 4 or more bedrooms. The main concern of this policy relates to the uncertainty identified through a potential gentrification of communities. Further to the mitigation provided by Policies CS 15 and CS 16 of the Core Strategy, it may be necessary for alternative policies or policy criteria to be included in the Plan to take account of a wider range of housing needs. |                           |          |            |       |             |                        |  |  |  |
