Listening and Attention Skills

November 2017

Children who learn to focus their attention and listen carefully should be able to build good relationships with other adults and children.

ACTIVITY – What did Simon say?

You could play this in a circle with others; put 3 or 4 everyday objects in the middle of the circle and say “Simon says pass teddy round” then “Simon says go the other way” then “Put teddy on your head” without saying “Simon says” which means that you *don't* do it.
