DETAIL (Including consultation carried out)

3. The Scrutiny Inquiry Panel undertook the inquiry over 5 evidence gathering meetings and received information from a wide variety of organisations. This included the Leader of the Council, Public Health England, academics from the Universities of Southampton, Cambridge and City – University of London,

Council, Testlands as well as Southampton City Council officers. 4. The draft final report, shown as Appendix 1, has been sent to the individuals who provided evidence to the Inquiry. Comments generated from this consultation process have been reflected in the final report. 5. The final meeting of the Scrutiny Inquiry Panel was due to be on 8th April 2020. Due to the Coronavirus this meeting was postponed. Evidence emerging from the pandemic has identified obesity as a risk factor that can worsen the effect of Covid-19. 6. Evidence presented to the Panel preceded the pandemic and the report has not been retrospectively changed to reflect the current position. It is the intention to reflect upon Covid-19, and the impact of the lockdown on childhood obesity, in the Chair's Introduction to the report that will be drafted prior to the final report being presented to the OSMC and Cabinet. 7. The Panel is now invited to consider the attached final report, and summary the draft conclusions and recommendations, and approve a final report for submission to the OSMC in August 2020. RESOURCE IMPLICATIONS Capital/Revenue/Property/Other 8. In practice any future resource implications arising from this review will be dependent upon whether, and how, each individual recommendation within the Inquiry report is progressed by the Executive. More detailed work will need to be undertaken by the Executive in considering its response to each the recommendations set out in the Inquiry report. LEGAL IMPLICATIONS Statutory power to undertake proposals in the report: 9. The duty to undertake overview and scrutiny is set out in Part 1A Section 9 of the Local Government Act 2000. Other Legal Implications: 10. None RISK MANAGEMENT IMPLICATIONS
