DETAIL (Including consultation carried out)	
3.	This paper provides an update on the development of the Integrated Care Partnership (ICP) as a core statutory committee within the integrated Care System (ICS).
4.	The ICP is a statutory committee jointly formed between the NHS Integrated Care Board and all upper-tier local authorities that fall within the ICS area. The ICP will bring together a broad alliance of partners concerned with improving the care, health and wellbeing of the population, with membership determined locally.
5.	The ICP is charged with developing the Integrated Care Strategy for the ICS and there is an expectation that an interim strategy will be developed by December 2022, complementing the strong role that Health & Wellbeing Boards play within each part of the ICS.

6.	Place Based governance elements of the ICS are being formed. The term 'place' is used to describe the geographical level that sits beneath an integrated care system. Boundaries of place are normally synonymous with local authority areas, and this is the case for the place of Southampton. Across the ICS, there will be 4 Places - Southampton, Portsmouth, Hampshire and Isle of Wight.
7.	Although Southampton has been successful in its integration journey with one of the largest pooled budgets across the country (circa £140m), as part of the current governments plans to ensure success like Southampton's is replicated across the country, new legislation has been developed to further support and deliver the next phase of this integration.
8.	The attached paper outlines the proposal for the Joint Commissioning Board (JCB) to be reconstituted as the strategic place-based partnership board for Southampton: The Southampton Health and Care Partnership Board from November 2022.
