

Appendix 3

Dear sir

Please accept this email as proof of my objection to the above preservation order.

I agree that we should be careful about preserving trees, but fail to see how the loss of any of these trees would have a " detrimental impact on the amenity of the area and the enjoyment by the public " being a school ground, with no access for the public.

The damage being caused by some of these trees to surrounding walls and play area's for the children are also not being taken into account.

Kind regards

*** **
