<b>BRIEF SUMMARY</b>
----------------------

<p>This report provides the panel with an update on the development of integrated neighbourhood working models, as part of the wider national and local strategic direction of travel around the 'left shift' of transferring care from hospitals to the community.</p>
---

<b>RECOMMENDATIONS:</b>
-------------------------

	(i)	That the Panel notes the attached briefing paper and discusses the national and local strategic direction, the current model of integrated neighbourhood teams, the early adopters in Southampton, and initial areas of focus.

<b>DETAIL (Including consultation carried out)</b>

3.	Nationally, the engagement process is underway for the new 10 Year Plan which we expect to be published in the coming months. This will set out how the country will achieve the 'left shift', which is around transferring care from hospitals to the community, digital transformation, and a shifting in priority from treatment towards prevention.
4.	For NHS Hampshire and Isle of Wight specifically, we now have more detail on our role for the years ahead. Following the publication of the Darzi Report in September, the Secretary of State has also started to provide more information on the role of Integrated Care Boards in the future, which are outlined in the attached report.
5.	NHS Hampshire and Isle of Wight are already supporting the new 'left shift' with many of the government's priorities reflected in our NHS system strategy document, Our Renewed Ambition, which was discussed with the panel in December 2024.
6.	A key way of delivering on these national and local ambitions is the focus on neighbourhood working.

7.	There is a long history in Southampton of working at a city or neighbourhood level, and this report highlights how we will build on this to establish integrated neighbourhood teams.
