

Appendix 3

After conversation with person from council, seems like there was huge misunderstanding.

This tree was TPO protected only on 16th Dec 2022 only after i have sent this email and simply requested some information. We just wanted to do everything right, we never said we want to remove this tree, the reason simply was that due to the branches we have no sun in this garden and even lawn have completely dissapiered due to this reason. We just wanted to trim few branches to have more sunlite and a bit less of leaves.

I have called council and the lady on the phone said there is no TPO on this tree, but just to be sure she advised me to send some pictures to be completely sure. Which we did. And just because of this reason TPO was added.

Regarding ****, he's no longer owns this property nor this land, as we purchased this land with the house, May 2022. Land registry is not updated yet (please see attached).

We would like to appeal this decision.

As we were told this decision was made just because land registry still shows that **** still owns this property and land.

Please advise what is the process for appealing.

Kind Regards
